AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

Processing facility operating year round with an average of 120 workers per shift (2 shifts). The facility consists of several buildings (2 processing, one packaging storage, cold storage, shipping and break rooms). Processing organic and conventional garlic. Process consist of peeling and packing fresh whole cloves, roasting, chipping, slicing crushing or making puree. In the process the product is rinsed with fresh water single use and rinsed for a second time with water treated with ozone, some of the whole peeled garlic is infused with oil, once processed, it is packed, passed thru metal detection or vice versa depending on process, palletized, stored in cold storage and shipped. The CCPs are the metal detection in all lines and pH level in the in the crush garlic cooking.
